

CS 3300 Project 2 Milestone 1
Annie Zhang (zz229), Oren Michaely (om72), Rachel Liu (rl544)

1. NYC airport delays throughout Winter Storm Grayson:
Bureau of Transportation Statistics: <https://www.transtats.bts.gov>
2. Profanity in top 25/50 songs throughout the years
3. Country performance in Olympics, by sport, throughout the years
<https://www.kaggle.com/the-guardian/olympic-games/data>
4. Satellites in space by countries over time; includes what the satellites are used for, what altitude they are at, etc
<https://www.ucsusa.org/nuclear-weapons/space-weapons/satellite-database#.WrQAXCjwZm8>
5. Homeless population and income per capita per state
<https://www.kaggle.com/bltxr9/eda-of-total-homeless-population/data>
<https://www.kaggle.com/goldenoakresearch/us-household-income-stats-geo-locations/data>

To do: find useful data sets and begin drawing mockups for ideas (from our 5) that we are interested in. Start thinking about how we can tie in different data sets for each of these initial ideas. Try to get the brainstorming done by Monday so that we can start coding before spring break.
